How to Access a Power BI Report in PowerPoint

Power BI reports can be accessed in Microsoft PowerPoint by using the Power BI add-in. This allows users to present and interact with Power BI reports directly from a PowerPoint presentation.

Steps to Access Power BI Report from PowerPoint

Step 1: Open Power BI Service

1. Open a web browser and sign in to Power BI Service.
2. Open the required workspace.
3. Open the Power BI report that you want to add to PowerPoint.

Step 2: Select Export to PowerPoint

1. In the Power BI report, select File.
2. Choose Export → PowerPoint.
3. Select the required export option.
4. PowerPoint will open/download with the report added to the presentation.

Step 3: Use the Power BI Add-in
Another method is to open Microsoft PowerPoint and select:

Insert → Get Add-ins → Power BI

Then select the Power BI add-in and sign in with your Power BI account.

Step 4: Add the Report
Copy the link of the Power BI report from Power BI Service and paste it into the Power BI add-in in PowerPoint. The report will appear as an interactive Power BI visual/page.

Step 5: Present the Report
During the presentation, you can interact with the Power BI report, such as applying filters and exploring the visuals, depending on the report and permissions.
